Sir,

Water supply to Yelahanka

With reference to your letter No L6224 of the 2nd instab on the above subject, I have the honour to for ard herewith for the information of Government a note of the Sanitary Engineer ~~Bowring~~ showing the present source of water supply to the population of the Yelahanka Town and the ways and means to tide over the water difficulty at the place

A comprehensive water supply scheme to the Town could be worked out only after testing the yield from the bore wells

I have the honour to be

S i r,

Your most obedient servant,

Kmk/9th

CHIEF ENGINEER FOR IRRIGATION

1.

Note on Yelahanka Water Supply

In the year 1932 a preliminary project for water supply to Yelahanka town from the existing two wells in the tank bed was proposed The capital cost of the project was Rs 7555/- and the maintenance charges came to about Rs 1350/-

In 1937 the Deputy Commissioner, Bangalore District, Bangalore in his letter No C 2 L 2021/36-37 dated 13-5-1937 to the Sanitary Engineer stated that the scheme may be dropped as the resources of Municipality did not permit of a recurring expenditure of Rs 1350/- on the maintenance of water supply

In the year 1940, the place was inspected by the Sanitary Engineer and arrangements were made to test the yield of the well, in consultation with the Municipal President The yield of the well was found to be only 600 gallons per hour and the president, Town Municipal Council, Yelahanka was intimated in this office No 451 dated 4/5th Oct 1941 as follows -

The population of Yelahanka Town being 4300 at present, the scheme for water supply would have to be prepared for a prospective population of 5000, so that, the daily requirements would be 50,000 gallons The yield as tested from the well is only 600 gals per hour and as such even if the pumping is dare for all the 24 hours, it cannot supply the quantity of water required Hence the present well, will not serve as adequate source for water supply to Yelahanka town

The present population of Yelahanka town is about 5000 and the quantity of water required per day is about 50,000 It is now proposed, to sink two borewells for this pupose and a scheme of water supply can be worked out after testing the yield of the borewells The President Town Municipal Council, Yelahanka, has been requested to deposit a sum of Rs 6000 for sinking ~~ten~~ two bore wells in the town and testing their ~~yield~~ yield in this office No 996 dated 27-11-1946

Sir

Sub: Water supply scheme to Yelahanka Town

With reference to your letter No L 7756 7 dated 25-11-46 on the above subject, I have the honour to state that the Sanitary Engineer has stated in his letter No 9956 dated 27-11 46 that two borewells will have to be sunk for the supply of 50 000 gallons of water a day and that a sum of Rs 6000 may be placed at his disposal for taking further action in the matter The Municipal council have at their meeting held on 29-11 46 resolved that a sum of Rs 6000 may be placed at the disposal of the Sanitary Engineer and that further action may also be taken in the matter Now that the town is growing in importance day by day and also that a new extension has been formed, it is necessary that the scheme should be taken up early

In the circumstances I request that sanction of Government may kindly be accorded to place a sum of Rs 6000 at the disposal of the Sanitary Engineer for the above work and to meet the same out of the closing balance (of Rs 65702 as on 28 2 47) of the Municipality The financial position of the Municipality allows the above expenditure The connected file of records accompany for favour of reference and return

I have the honor to be
Sir
Your most obedient servant
